SUBJECT INDEX TO VOLUME 39 (1998)

Nervous system (incl. skull)

Pituitary dimensions and volume measurements in pregnancy and *post partum*. MR assessment 64
Aneurysm clip MR artifacts. Titanium versus stainless steel and influence of imaging parameters 70
Adrenoleukodystrophy – unusual CT and MR findings in two siblings. Case reports 77
Is it dangerous to inject MR contrast media into the subarachnoid space? 100
Contrast enhancement in the craniopharyngioma cyst wall caused by irradiation 180
Development of a huge varix following endovascular embolization for cerebellar arteriovenous malformation. A case report 189
Malignant glioma. Evaluation with 3D time-of-flight MR angiography 227
Three-dimensional spiral CT angiography in the detection of cerebral aneurysm 233
Review article. Diffusion-weighted MR imaging of acute cerebral ischemia 460
The effect of paramagnetic contrast media on T1 relaxation times in brain tumors 474
White matter abnormalities in tuberous sclerosis complex 482
An experimental high-resolution MR coil for the imaging of pathological findings in the *post mortem* brain stem 487
MR findings in three pituitary abscesses. Case reports 490
Proton MR spectroscopy in infants with cerebral energy deficiency due to hypoxia and metabolic disorders 700
Shear stress in cerebral arteries carrying saccular aneurysms. A preliminary study 710
Optimising contrast-enhanced cranial CT for detection of brain metastases 717
Embolotherapy for pulmonary arteriovenous malformations in patients with hereditary hemorrhagic telangiectasia (Osler-Weber-Rendu syndrome) 722
MR findings of primary central nervous system lymphoma in a child. A case report 726

Ear, nose, throat and eye

Increased accuracy in MR diagnosis of uveal melanoma by carbohydrate loading. A simple method that reflects rapid metabolic change 239
Optic neuritis. Doppler ultrasonography compared with MR and correlated with visual evoked potential assessments 243

Bones, joints and soft tissues

MR abnormalities of the intervertebral disks and adjacent bone marrow as predictors of segmental instability of the lumbar spine 18
Joint-space width in the axial view of the patello-femoral joint. Definitions and comparison with MR imaging 24
Joint-space width in the weight-bearing radiogram of the tibiofemoral joint. Should the patient stand on one leg or two? 32
MR imaging of multiple myeloma patients with bone-marrow transplants 36
Bone fragility induced by X-ray irradiation in relation to cortical bone-mineral content 43
Septic and aseptic post-operative discitis in the lumbar spine – evaluation by MR imaging 108
Multiplanar reconstruction in MR imaging of the knee. Comparison with standard sagittal and coronal images 116
Fast spin-echo MR of the articular cartilage in the osteoarthrotic knee. Correlation of MR and arthroscopic findings 120
MR imaging in chronic Achilles tendon disorder ... 126
Multiplanar and 3D CT of acetabular fractures 257
The role of CT in the diagnosis of sacro-iliitis 265
Tumoral calcium pyrophosphate dihydrate deposition disease with bone destruction in the shoulder. CT and MR findings in two cases 269
MR imaging in shoulder trauma. Value of STIR images 273
MR findings in tibial adamantinoma. A case report . 276
Measuring anteversion in the femoral neck from routine radiographs 410
Radiographically negative stress-related bone injury. MR imaging versus two-phase bone scintigraphy . 416
Color Doppler ultrasonography of soft-tissue masses 421
Influence of the phosphate balance on the activity distribution of ^{99m}Tc-hydroxymethylene diphosphonate. Experimental studies in the mouse 427
Clinical value of imaging techniques in childhood osteomyelitis 523
Synovitis in Legg-Calvé-Perthes disease. Evaluation with MR imaging in 84 hips 532
Bone mineral density and spongiosa architecture in correlation to vertebral body insufficiency fractures 538
Functional MR imaging of the cervical spine in patients with rheumatoid arthritis 543
High-resolution MR imaging of the cutis and subcutis. Histological correlation 547
MR appearance of anomalous insertion of the medial meniscus. A case report 554
Axial loading of the spine during CT and MR in patients with suspected lumbar spinal stenosis 604
Ultrasonography in the differential diagnosis of Achilles tendon injuries and related disorders. A comparison between pre-operative ultrasonography and surgical findings 612
Multiple fractionated and single-dose irradiation of bone marrow. Evaluation by MR and correlation with histopathological findings 620

Agreement between radiographic and photographic trabecular patterns 625
Bone mineral density in the lumbar spine as determined by dual-energy X-ray absorptiometry. Comparison of whole-body scans and dedicated regional scans 632
Broadband ultrasound attenuation of the calcaneus. A tool for assessing bone status in patients with chronic renal failure 637
Assessment of image post-processing and of measuring assistance tools in computed radiography. Evaluation of the weight-bearing knee 642
Bone demarcation of the temporomandibular joint. Validity of clinical assessment of bone thickness by means of CT 649
Weight-bearing radiographs with the patient standing on one leg or two 735

Breast

Contrast-enhanced MR imaging as a prognostic indicator of breast cancer 279
Ultrasonography of invasive lobular breast carcinoma 285
Ultrasonography as a guidance method in the evaluation of mammographically detected nonpalpable breast lesions of suspected malignancy 292
Sensitivity and specificity of computer-assisted breast cancer detection in mammography screening 384
Stereotaxic core needle aspiration biopsy with multiple passes in nonpalpable breast lesions 389
Mechanism of contrast enhancement in breast lesions at MR imaging 494
Development of a phantom and a new method for determination of receiver operating characteristics . . 501
Assessment of image quality and total performance in Norwegian mammography laboratories. Findings in a national survey based on different phantoms and ROC methodology 507
Comparison of the contrast enhancement pattern in two different T1-weighted 3-D sequences in MR imaging of the breast 679

Cardiovascular system

Portal and splanchnic haemodynamics in patients with advanced post-hepatitic cirrhosis and in healthy adults. Assessment with duplex Doppler ultrasound 152
Duplex ultrasound in the subclavian steal syndrome 183
Development of a huge varix following endovascular embolization for cerebellar arteriovenous malformation. A case report 189
Dedicated head-neck coil in MR angiography of the supra-aortic arteries from the aortic arch to the circle of Willis 249
Review article. Thrombotic complications in coronary angioplasty – ionic versus non-ionic low-osmolar contrast media 340
Hepatocellular carcinomas supplied by inferior phrenic arteries 443
Correlation between dose rate and T1 in blood at Gd-enhanced MR angiography 579
Percutaneous transluminal renal artery angioplasty using the coaxial technique. Ten years of experience from 591 procedures in 419 patients 594
Coronary arteriopathy after heart transplantation . . 656
2D inflow MR angiography in severe chronic leg ischemia 662
Clinical outcome of stenting in superior vena cava syndrome associated with malignant tumors. Comparison with conventional treatment 668
Doppler ultrasound assessment of TIPS patency and function – the need for echo enhancers 674
Transcatheter embolization of celiac artery pseudoaneurysm following pancreaticoduodenectomy for pancreatic cancer. A case report 689
Shear stress in cerebral arteries carrying saccular aneurysms. A preliminary study 710
Embolotherapy for pulmonary arteriovenous malformations in patients with hereditary hemorrhagic telangiectasia (Rendu-Osler-Weber syndrome) 722

Mediastinum and respiratory system

Pulmonary edema following intravenous injection of nonionic low-osmolar contrast medium – appearance on HRCT 81
Sedation versus general anaesthesia in paediatric patients undergoing chest CT 298
MR imaging in a desmoid tumor of the posterior mediastinum with extension into the abdominal cavity. A case report 301
CT-guided transthoracic fine-needle aspiration versus transbronchial fluoroscopy-guided needle aspiration in pulmonary nodules 395
Thoracic CT findings at hypovolemic shock 400
Dose reduction in thorax radiography in simulated neonates with additional filtration and digital luminescence radiography 514
Pleural pneumatocoeles mimicking congenital cystic adenomatoid malformation of the lung. A case report 520

Digestive tract

Advance in the diagnosis of esophageal carcinoma. A new imaging process by adaptive spatial filtering of computed esophagograms 47
Conventional plain-film radiology, ultrasonography and CT in jejuno-ileal perforation 52
Enteroclysis-guided fine-needle aspiration cytology of focal small-bowel lesions 57
Early esophageal carcinoma. Evaluation of the depth of invasion based on double-contrast esophagography 133
Portal and splanchnic haemodynamics in patients with

advanced post-hepatitic cirrhosis and in healthy adults. Assessment with duplex Doppler ultrasound 152
MR features of a 24-year-old gossypiboma. A case report 176
Diagnosis of acute left-sided colonic diverticulitis by three radiological modalities 315
Videomanometry of the pharynx in dysphagic patients with laryngeal barium penetration during swallowing 405

Liver, biliary tract

Sensitivity in detection of hypervascular hepatocellular carcinoma by helical CT with intra-arterial injection of contrast medium, and by helical CT and MR imaging with intravenous injection of contrast medium 144
Electrolytic stent in the normal bile duct. An experimental study 157
Magnetic starch microspheres in the MR imaging of hepatic metastases. A preclinical study in the nude rat 161
The prognostic value of a rare sonographic pattern in Wilson's disease. A case report 179
Hepatic parenchymal perfusion abnormalities after pancreaticobiliary surgery. Evaluation with dynamic helical CT 304
Relationship of ^{31}P MR spectroscopy to the histopathological grading of chronic hepatitis and response to therapy 309
Detecting experimental liver metastases at CT with the hepatocyte-specific contrast medium FP 736–03 . . 381
MR and magnetisation transfer imaging in cirrhotic and fatty livers 434
Single-shot diffusion-weighted echo-planar imaging of normal and cirrhotic livers using a phased-array multicoil 440
Hepatocellular carcinomas supplied by inferior phrenic arteries 443
MR and CT cholangiography in evaluation of the biliary tract 557
Colour Doppler imaging of shunts from the left portal branch in portal hypertension. Description of a typical pattern 564
The efficacy of FP 736–04 in experimental liver cirrhosis 568
Doppler ultrasound assessment of TIPS patency and function – the need for echo enhancers 674
Transjugular biopsy of the liver with an automated device 685
3D surface rendering of images from multiple MR pulse sequences in the pre-operative evaluation of hepatic lesions 697

Spleen, pancreas

Spiral CT of the pancreas. The value of small field-of-view targeted reconstruction 60
Spiral CT during pharmacoangiography with angiotensin II in patients with pancreatic disease. Technique and diagnostic efficacy 138
A case of functioning insulinoma. Successful localization with dynamic spiral CT 454
Transcatheter embolization of celiac artery pseudoaneurysm following pancreaticoduodenectomy for pancreatic cancer. A case report 690

Abdomen

Peritoneocele and enterocele. Formation and transformation during rectal evacuation as studied by means of defaeco-peritoneography 167
Abdominal tuberculosis. A case report 693
Paediatric mesenteric lipoma, an unusual cause of repeated abdominal pain. A case report 695
Acute side effects of iopromide and diatrizoate in urography 734

Urogenital system

Familial juvenile nephronophthisis. An ultrasonographic follow-up of seven patients 84
Iodine concentrations in the rat kidney measured by X-ray microanalysis. Comparison of concentrations and viscosities in the proximal tubules and renal pelvis after intravenous injections of contrast media . . 90
Carcinoma of the uterine cervix. High-resolution turbo spin-echo MR imaging with contrast-enhanced dynamic scanning and T2-weighting 322
Krukenberg tumor findings at color and power Doppler US; correlation with findings at CT, MR imaging, and pathology. Case reports 327
Assessment of possible nephrotoxicity from iohexol in patients with normal and impaired renal function 362
Effect of iodixanol on renal function immediately after abdominal angiography. Clinical comparison with iomeprol and ioxaglate 368
Evaluation of DSMA scintigraphy and urography in assessing both acute and permanent renal damage in children 447
Testicular microlithiasis – a possibly premalignant condition. Report of five cases and a review of the literature 583
Percutaneous transluminal renal artery angioplasty using the coaxial technique. Ten years of experience from 591 procedures in 419 patients 594
Diagnostic quality in hysterosalpingography. Comparison between iodixanol and iotrolan 730

Endocrine system

CT in spontaneous adrenal gland rupture. A case report 330

Lymphatic system

Atypical CT findings of cervical lymphadenopathy due to Hodgkin's disease. A case report 587

Pediatric radiology

Adrenoleukodystrophy – unusual CT and MR findings in two siblings. Case reports 77
Familial juvenile nephronophthisis. An ultrasonographic follow-up of seven patients 84
Sedation versus general anaesthesia in paediatric patients undergoing chest CT 298
Evaluation of DSMA scintigraphy and urography in assessing both acute and permanent renal damage in children 447
White matter abnormalities in tuberous sclerosis complex 482
Dose reduction in thorax radiography in simulated neonates with additional filtration and digital luminescence radiography 514
Pleural pneumatocoeles mimicking congenital cystic adenomatoid malformation of the lung. A case report 520
Clinical value of imaging techniques in childhood osteomyelitis 523
Synovitis in Legg-Calvé-Perthes disease. Evaluation with MR imaging in 84 hips 532
Paediatric mesenteric lipoma, an unusual cause of repeated abdominal pain. A case report 695
Proton MR spectroscopy in infants with cerebral energy deficiency due to hypoxia and metabolic disorders 701
MR findings of primary central nervous system lymphoma in a child. A case report 727

Digital radiography

Dose reduction in thorax radiography in simulated neonates with additional filtration and digital luminescence radiography 514
Assessment of image post-processing and of measuring assistance tools in computed radiography. Evaluation of the weight-bearing knee 642

Ultrasonography

Advance in the diagnosis of esophageal carcinoma. A new imaging process by adaptive spatial filtering of computed esophagograms 47
Familial juvenile nephronophthisis. An ultrasonographic follow-up of seven patients 84
Helium gas microbubbles. Experimental study on a new ultrasound contrast material 96
Portal and splanchnic haemodynamics in patients with advanced post-hepatitic cirrhosis and in healthy adults. Assessment with duplex Doppler ultrasound 152
The prognostic value of a rare sonographic pattern in Wilson's disease. A case report 179
Duplex ultrasound in the subclavian steal syndrome 183
Reliability of Doppler ultrasound in follow-up studies 193
Optic neuritis. Doppler ultrasonography compared with MR and correlated with visual evoked potential assessments 243
Ultrasonography of invasive lobular breast carcinoma 285
Ultrasonography as a guidance method in the evaluation of mammographically detected nonpalpable breast lesions of suspected malignancy 292
Sedation versus general anaesthesia in paediatric patients undergoing chest CT 298
Diagnosis of acute left-sided colonic diverticulitis by three radiological modalities 315
Krukenberg tumor findings at color and power Doppler US; correlation with findings at CT, MR imaging, and pathology. Case reports 327
Color Doppler ultrasonography of soft-tissue masses 421
Clinical value of imaging techniques in childhood osteomyelitis 523
Colour Doppler imaging of shunts from the left portal branch in portal hypertension. Description of a typical pattern 564
Testicular microlithiasis – a possibly premalignant condition. Report of five cases and a review of the literature 583
Ultrasonography in the differential diagnosis of Achilles tendon injuries and related disorders. A comparison between pre-operative ultrasonography and surgical findings 612
Broadband ultrasound attenuation of the calcaneus. A tool for assessing bone status in patients with chronic renal failure 637
Doppler ultrasound assessment of TIPS patency and function – the need for echo enhancers 675
Paediatric mesenteric lipoma, an unusual cause of repeated abdominal pain. A case report 695

CT

Advance in the diagnosis of esophageal carcinoma. A new imaging process by adaptive spatial filtering of computed esophagograms 47
Spiral CT of the pancreas. The value of small field-of-view targeted reconstruction 60
Adrenoleukodystrophy – unusual CT and MR findings in two siblings. Case reports 77
Spiral CT during pharmacoangiography with angiotensin II in patients with pancreatic disease. Technique and diagnostic efficacy 138
Sensitivity in detection of hypervascular hepatocellular carcinoma by helical CT with intra-arterial injection of contrast medium, and by helical CT and MR imaging with intravenous injection of contrast medium 144

Three-dimensional spiral CT angiography in the detection of cerebral aneurysm 233
Multiplanar and 3D CT of acetabular fractures 257
The role of CT in the diagnosis of sacro-iliitis 265
Tumoral calcium pyrophosphate dihydrate deposition disease with bone destruction in the shoulder. CT and MR findings in two cases 269
Hepatic parenchymal perfusion abnormalities after pancreaticobiliary surgery. Evaluation with dynamic helical CT 304
Diagnosis of acute left-sided colonic diverticulitis by three radiological modalities 315
Krukenberg tumor findings at color and power Doppler US; correlation with findings at CT, MR imaging, and pathology. Case reports 327
CT in spontaneous adrenal gland rupture. A case report 330
Detecting experimental liver metastases at CT with the hepatocyte-specific contrast medium FP 736–03 . . 381
CT-guided transthoracic fine-needle aspiration versus transbronchial fluoroscopy-guided needle aspiration in pulmonary nodules 395
Thoracic CT findings at hypovolemic shock 400
A case of functioning insulinoma. Successful localization with dynamic spiral CT 454
Pleural pneumatocoeles mimicking congenital cystic adenomatoid malformation of the lung. A case report 520
Clinical value of imaging techniques in childhood osteomyelitis 523
MR and CT cholangiography in evaluation of the biliary tract 557
The efficacy of FP 736–04 in experimental liver cirrhosis 568
Atypical CT findings of cervical lymphadenopathy due to Hodgkin's disease. A case report 587
Axial loading of the spine during CT and MR in patients with suspected lumbar spinal stenosis 604
Bone demarcation of the temporomandibular joint. Validity of clinical assessment of bone thickness by means of CT 649
Abdominal tuberculosis. A case report 693
Paediatric mesenteric lipoma, an unusual cause of repeated abdominal pain. A case report 695
Optimising contrast-enhanced cranial CT for detection of brain metastases 718

MR imaging and spectroscopy

Overhauser-enhanced MR imaging (OMRI) 10
MR abnormalities of the intervertebral disks and adjacent bone marrow as predictors of segmental instability of the lumbar spine 18
Joint-space width in the axial view of the patello-femoral joint. Definitions and comparison with MR imaging 24
MR imaging of multiple myeloma patients with bone-marrow transplants 36
Pituitary dimensions and volume measurements in pregnancy and *post partum*. MR assessment 64
Aneurysm clip MR artifacts. Titanium versus stainless steel and influence of imaging parameters 70
Adrenoleukodystrophy – unusual CT and MR findings in two siblings. Case reports 77
Septic and aseptic post-operative discitis in the lumbar spine – evaluation by MR imaging 108
Multiplanar reconstruction in MR imaging of the knee. Comparison with standard sagittal and coronal images 116
Fast spin-echo MR of the articular cartilage in the osteoarthrotic knee. Correlation of MR and arthroscopic findings 120
MR imaging in chronic Achilles tendon disorder . . . 126
Sensitivity in detection of hypervascular hepatocellular carcinoma by helical CT with intra-arterial injection of contrast medium, and by helical CT and MR imaging with intravenous injection of contrast medium 144
Malignant glioma. Evaluation with 3D time-of-flight MR angiography 227
Increased accuracy in MR diagnosis of uveal melanoma by carbohydrate loading. A simple method that reflects rapid metabolic change 239
Optic neuritis. Doppler ultrasonography compared with MR and correlated with visual evoked potential assessments 243
Dedicated head-neck coil in MR angiography of the supra-aortic arteries from the aortic arch to the circle of Willis 249
Tumoral calcium pyrophosphate dihydrate deposition disease with bone destruction in the shoulder. CT and MR findings in two cases 269
MR imaging in shoulder trauma. Value of STIR images 273
MR findings in tibial adamantinoma. A case report . 276
Contrast-enhanced MR imaging as a prognostic indicator of breast cancer 279
MR imaging in a desmoid tumor of the posterior mediastinum with extension into the abdominal cavity. A case report 301
Relationship of ^{31}P MR spectroscopy to the histopathological grading of chronic hepatitis and response to therapy 309
Carcinoma of the uterine cervix. High-resolution turbo spin-echo MR imaging with contrast-enhanced dynamic scanning and T2-weighting 322
Radiographically negative stress-related bone injury. MR imaging versus two-phase bone scintigraphy . 416
MR and magnetisation transfer imaging in cirrhotic and fatty livers 434
Single-shot diffusion-weighted echo-planar imaging of normal and cirrhotic livers using a phased-array multicoil 440

Review article. Diffusion-weighted MR imaging of acute cerebral ischemia 460
The effect of paramagnetic contrast media on T1 relaxation times in brain tumors 474
White matter abnormalities in tuberous sclerosis complex 482
An experimental high-resolution MR coil for the imaging of pathological findings in the *post mortem* brain stem 487
MR findings in three pituitary abscesses. Case reports 490
Mechanism of contrast enhancement in breast lesions at MR imaging 494
Clinical value of imaging techniques in childhood osteomyelitis 523
Synovitis in Legg-Calvé-Perthes disease. Evaluation with MR imaging in 84 hips 532
High-resolution MR imaging of the cutis and subcutis. Histological correlation 547
MR appearance of anomalous insertion of the medial meniscus. A case report 554
MR and CT cholangiography in evaluation of the biliary tract 557
Correlation between dose rate and T1 in blood at Gd-enhanced MR angiography 579
Axial loading for the spine during CT and MR in patients with suspected lumbar spinal stenosis 604
Multiple fractionated and single-dose irradiation of bone marrow. Evaluation by MR and correlation with histopathological findings 620
2D inflow MR angiography in severe chronic leg ischemia 663
Comparison of the contrast enhancement pattern in two different T1-weighted 3-D sequences in MR imaging of the breast 680
3D surface rendering of images from multiple MR pulse sequences in the pre-operative evaluation of hepatic lesions 698
Proton MR spectroscopy in infants with cerebral energy deficiency due to hypoxia and metabolic disorders 701
MR findings of primary central nervous system lymphoma in a child. A case report 727

Nuclear radiology

Influence of the phosphate balance on the activity distribution of ^{99m}Tc-hydroxymethylene diphosphonate. Experimental studies in the mouse 427
Evaluation of DSMA scintigraphy and urography in assessing both acute and permanent renal damage in children 447

Interventional radiology

Enteroclysis-guided fine-needle aspiration cytology of focal small-bowel lesions 57
Electrolytic stent in the normal bile duct. An experimental study 157
Ultrasonography as a guidance method in the evaluation of mammographically detected nonpalpable breast lesions of suspected malignancy 292
Stereotaxic core needle aspiration biopsy with multiple passes in nonpalpable breast lesions 389
CT-guided transthoracic fine-needle aspiration versus transbronchial fluoroscopy-guided needle aspiration in pulmonary nodules 395
Percutaneous transluminal renal artery angioplasty using the coaxial technique. Ten years of experience from 591 procedures in 419 patients 594
Clinical outcome of stenting in superior vena cava syndrome associated with malignant tumors. Comparison with conventional treatment 669
Doppler ultrasound assessment of TIPS patency and function – the need for echo enhancers 675
Transjugular biopsy of the liver with an automated device 686
Transcatheter embolization of celiac artery pseudoaneurysm following pancreaticoduodenectomy for pancreatic cancer. A case report 69
Embolotherapy for pulmonary arteriovenous malformations in patients with hereditary hemorrhagic telangiectasia (Rendu-Osler-Weber syndrome) 723

Experimental radiology

Clinical multi-colour fluorescence imaging of malignant tumours – initial experience 2
Effect of nitrendipine on renal function and on hormonal parameters after intravascular iopromide . . 375
Detecting experimental liver metastases at CT with the hepatocyte-specific contrast medium FP 736–03 . . 381
Sensitivity and specificity of computer-assisted breast cancer detection in mammography screening 384
Influence of the phosphate balance on the activity distribution of ^{99m}Tc-hydroxymethylene diphosphonate. Experimental studies in the mouse 427
Changes in tissue oxygen tension caused by contrast media injected into the femoral artery of the dog . 572

Contrast media and other drugs

Pulmonary edema following intravenous injection of nonionic low-osmolar contrast medium – appearance on HRCT. A case report 81
Iodine concentrations in the rat kidney measured by X-ray microanalysis. Comparison of concentrations and viscosities in the proximal tubules and renal pelvis after intravenous injections of contrast media . . 90
Helium gas microbubbles. Experimental study on a new ultrasound contrast material 96
Is it dangerous to inject MR contrast media into the subarachnoid space? 100

Spiral CT during pharmacoangiography with angiotensin II in patients with pancreatic disease. Technique and diagnostic efficacy 138
Sensitivity in detection of hypervascular hepatocellular carcinoma by helical CT with intra-arterial injection of contrast medium, and by helical CT and MR imaging with intravenous injection of contrast medium 144
Magnetic starch microspheres in the MR imaging of hepatic metastases. A preclinical study in the nude rat 161
Contrast enhancement in the craniopharyngioma cyst wall caused by irradiation 180
Review article. Treatment of the adverse effects of contrast media 212
Frequency of late allergy-like adverse reactions following injection of intravascular non-ionic contrast media. A retrospective study comparing a non-ionic monomeric contrast medium with a non-ionic dimeric contrast medium 219
Gd-DTPA as an alternative contrast agent in conventional and interventional radiology 223
Increased accuracy in MR diagnosis of uveal melanoma by carbohydrate loading. A simple method that reflects rapid metabolic change 239
Contrast-enhanced MR imaging as a prognostic indicator of breast cancer 279
Review article. Thrombotic complications in coronary angioplasty – ionic versus non-ionic low-osmolar contrast media 340
Late allergy-like reactions following vascular administration of radiography contrast media 344
Iohexol, platelet activation and thrombosis. I. Iohexol-induced platelet secretion does not affect thrombus formation in native blood 349
Iohexol, platelet activation and thrombosis. II. Iohexol-induced platelet secretion does not affect collagen-induced or tissue-factor-induced thrombus formation in blood that is anticoagulated with heparin and aspirin 355
Assessment of possible nephrotoxicity from iohexol in patients with normal and impaired renal function 362
Effect of iodixanol on renal function immediately after abdominal angiography. Clinical comparison with iomeprol and ioxaglate 368
Iodixanol is readily eliminated by hemodialysis 372
Effect of nitrendipine on renal function and on hormonal parameters after intravascular iopromide . . 375
Detecting experimental liver metastases at CT with the hepatocyte-specific contrast medium FP 736–03 . . 381
The effect of paramagnetic contrast media on T1 relaxation times in brain tumors 474
Mechanism of contrast enhancement in breast lesions at MR imaging 494
The efficacy of FP 736–04 in experimental liver cirrhosis 568
Changes in tissue oxygen tension caused by contrast media injected into the femoral artery of the dog . 572
Gadopentetate dimeglumine as a contrast agent in peripheral angioplasty. A case report 576
Correlation between dose rate and T1 in blood at Gd-enhanced MR angiography 579
Comparison of the contrast enhancement pattern in two different T1-weighted 3-D sequences in MR imaging of the breast 680
Optimising contrast-enhanced cranial CT for detection of brain metastases 718
Diagnostic quality in hysterosalpingography. Comparison between iodixanol and iotrolan 730
Acute side effects of iopromide and diatrizoate in urography 734

Physics and technique

Clinical multi-colour fluorescence imaging of malignant tumours – initial experience 2
Overhauser-enhanced MR imaging (OMRI) 10
Advance in the diagnosis of esophageal carcinoma. A new imaging process by adaptive spatial filtering of computed esophagograms 47
Costs of plain-film radiography in a partially digitized radiology department. An activity-based cost analysis 200
Dedicated head-neck coil in MR angiography of the supra-aortic arteries from the aortic arch to the circle of Willis 249
Multiplanar and 3D CT of acetabular fractures 257
Sedation versus general anaesthesia in paediatric patients undergoing chest CT 298
Film processing and the environment. Reducing pollution, water consumption, and costs 332
Iodixanol is readily eliminated by hemodialysis 372
An experimental high-resolution MR coil for the imaging of pathological findings in the *post mortem* brain stem 487
Detectability of simulated masses and calcifications in mammography. Development of a phantom and a new method for determination of receiver operating characteristics 501
Assessment of image quality and total performance in Norwegian mammography laboratories. Findings in a national survey based on different phantoms and ROC methodology 507
Agreement between radiographic and photographic trabecular patterns 625
Bone mineral density in the lumbar spine as determined by dual-energy X-ray absorptiometry. Comparison of whole-body scans and dedicated regional scans 632
3D surface rendering of images from multiple MR pulse sequences in the pre-operative evaluation of hepatic lesions 698

Research and methodology

Iodine concentrations in the rat kidney measured by X-ray microanalysis. Comparison of concentrations and viscosities in the proximal tubules and renal pelvis after intravenous injections of contrast media . . 90
Magnetic starch microspheres in the MR imaging of hepatic metastases. A preclinical study in the nude rat 161
Reliability of Doppler ultrasound in follow-up studies 193
Sensitivity and specificity of computer-assisted breast cancer detection in mammography screening 384

Miscellaneous

Costs of plain-film radiography in a partially digitized radiology department. An activity-based cost analysis 200

SUPPLEMENTS PUBLISHED IN ACTA RADIOLOGICA VOL. 39, 1998

No. 413 **Staffan Bremmer:** *Peritoneocele. A radiologic study with defaecoperitoneography.*

No. 414 **Per Grane:** *The post-operative lumbar spine. A radiological investigation of the lumbar spine after discectomy using MR imaging and CT.*

No. 415 **Chen Wang:** *Mangafodipir trisodium (MnDPDP)-enhanced magnetic resonance imaging of the liver and pancreas.*

No. 416 **Michael Bachmann Nielsen:** *Endosonography of the anal sphincter muscles in healthy volunteers and in patients with defecation disorders.*

No. 417 **Miriam Rodriguez:** *Computed tomography, magnetic resonance imaging and positron emission tomography in non-Hodgkin's lymphoma.*

No. 418 **Torsten Boegård:** *Radiography and bone scintigraphy in osteoarthritis of the knee – comparison with MR imaging.*

No. 419 **Finn Rasmussen:** *The influence of radiographic contrast media on some granulocyte functions.*

No. 420 **Beata Boné:** *Contrast medium enhanced magnetic resonance imaging in diagnosis of breast diseases.*
